(Stated in Canadian Dollars)

Gulf & Pacific Equities Corp. ("the Company") was incorporated under the Business Corporations Act (Alberta) on April 8, 1998 and on June 17, 1998 filed Articles of Amendment to remove certain private corporation restrictions. The registered address and records office of the Company is located at 18104 102 Avenue N.W., Edmonton, AB. The Company is listed on the TSX Venture Exchange as "TSX-V: GUF". The Company commenced active operations during the 1999 fiscal year. The Company owns and operates commercial rental properties in Western Canada. The Company does not have any affiliates nor is it the subsidiary of any entity.

1. Basis of Presentation

a) Statement of Compliance

The Company's condensed interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"). The IAS 34 condensed interim financial statements do not include all of the information required for annual financial statements.

These condensed interim financial statements should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2018.

The policies applied in the Company's condensed interim financial statements are in accordance with International Financial Reporting Standards ("IFRS") effective as of March 31, 2019 as issued by the International Accounting Standards Board.

The date that the Board of Directors approved the statements is May 23, 2019.

b) Critical judgments, accounting estimates and assumptions

The Company makes estimates and assumptions that affect the carrying amounts of assets and liabilities, disclosure of contingent assets and liabilities and the reported amount of earnings for the period. Actual results could differ. The estimates and assumptions that the Company considered critical are described below:

i) Investment properties

The fair value of the investment properties is determined based on either internal valuation models incorporating market evidence or valuations performed by independent third party appraisers. The determination of the fair value of investment properties requires the use of estimates such as future cash flows from assets (such as tenant profiles, future revenue streams and overall repair and condition of the property) and discount rates applicable to those cash flows. These estimates are based on market conditions existing at the reporting date. The following approaches, either individually or in combination, are used in the determination of the fair value of the investment properties:

1. Basis of Presentation and Going Concern (continued)

b) Critical judgments, accounting estimates and assumptions (continued)

i) Investment properties (continued)

The Direct Capitalization Income Approach derives market value by estimating the future cash flows that will be generated by the property and then applying an appropriate capitalization rate or discount rate to those cash flows. This approach can utilize the direct capitalization method and/or the discounted cash flow analysis.

The Direct Comparison Approach involves comparing or contrasting the recent sale, listing or optioned prices of properties comparable to the subject and adjusting for any significant differences between them.

Management reviews each appraisal (when obtained) and ensures the assumptions used by the appraisers are reasonable and the final fair value amount reflects those assumptions used in the various approaches above. Where an external appraisal is not obtained at the reporting date, management prepares internal valuations, for each investment property, to estimate the fair value.

Judgment is also applied in determining the extent and frequency of independent appraisals in order to determine fair values. The significant assumptions used by management in estimating the fair value of investment properties are set out in Note 4.

In addition, the Company makes judgments with respect to whether tenant improvement expenditures represent an asset with a future economic benefit to the Company which impacts whether or not such amounts are treated as additions to the investment properties.

ii) Leases

The Company makes judgments in determining whether certain leases, in particular those tenant leases with long contractual terms where the lessee is the sole tenant in a property, are operating or finance leases. The Company has determined that all of its leases are operating leases.

Additional critical accounting estimates and assumptions include those used for estimating current and deferred taxes and purchase price payable, assessing the allowance for doubtful accounts on trade receivables, estimating the fair value of share-based compensation and determining the values of financial instruments for disclosure purposes.

2. Summary of Significant Accounting Policies

The Company's complete accounting policies have been included in the financial statements for the year ended at December 31, 2018. The accounting policies the company followed in the preparation of these condensed interim financial statements were the same as those applied by the Company in the annual financial statements as at and for the year ended December 31, 2018.

2. Summary of Significant Accounting Policies (continued)

a) Changes in accounting standards effective January 1, 2019:

IFRS 16 Leases ("IFRS 16") was issued by the IASB in January 2016 and replaces IAS 17, Leases for annual periods beginning on or after January 1, 2019. IFRS 16 specifies the methodology to recognize, measure, present, and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases except for short-term leases and leases with low value assets. A lessee will apply IFRS 16 to its leases either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of applying IFRS 16 being recognized at the date of initial application. The Company adopted IFRS 16 on the required effective date of January 1, 2019 without restatement of comparative information. The cumulative effects of application of IFRS 16 resulted in \$1,880 decrease in opening retained earnings as at January 1, 2019 and resulted in a \$80,590 increase in total assets and \$82,470 increase in total liabilities as at January 1, 2019.

The Company's only lease is an operating lease for its corporate office.

3. Other Amounts Receivable

Other amounts receivable includes amounts receivable of trade accounts receivable of \$87,960 (December 31, 2018 - \$10,248) and taxes receivable of \$48 (December 31, 2018 - \$1,475).

4. Investment Properties

	<u>March 31, 2019</u>	<u>December 31, 2018</u>
Balance - Opening	\$ 40,500,000	\$ 40,500,000
Additions	-	10,831
Leasing costs	-	171
Leasing costs amortization	(48,394)	(193,566)
Accrued rent receivable	(48,084)	68,929
Fair value adjustment	96,478	113,635
Balance - Ending	<u>\$ 40,500,000</u>	<u>\$ 40,500,000</u>

The Company holds three investment properties and determines the fair value of each investment property based on external appraisals and internal review.

External appraisals for the three properties, totaling \$41,400,000, were obtained for the year ended December 31, 2016. As at December 31, 2018 and 2017, internal fair value for the three properties of \$40,500,000 was determined based on the direct capitalization income approach as defined below. Capitalization rates of 7.00% to 7.25% as at March 31, 2019 (December 31, 2018 - 7.00% to 7.25%) were used to determine the fair value of the properties. The weighted average capitalization rate for March 31, 2019 was 7.00% (December 31, 2018 - 7.00%).

4. Investment Properties (continued)

As at December 31, 2018, management performed an assessment of the underlying inputs and principles of the December 31, 2016 appraisals and noted a decrease in revenue on one of the properties; thus an internal review was completed for December 31, 2018. As a result, management recorded an aggregate fair value adjustment of \$113,635 to increase the carrying value of the properties as at December 31, 2018.

The internal fair values were based on the direct capitalization income approach with reference to the direct comparison approach and external appraisers for additional support. The fair value is determined by applying a capitalization rate to stabilized net operating income which incorporates allowances for vacancy, management fees and structural reserves for capital expenditures for the investment property. The resulting capitalized value is further adjusted, where appropriate, for costs to stabilize the income and non-recoverable capital expenditures.

Management will obtain new external appraisals if the conditions disclosed change materially. The Company has classified the three investment properties as level 3 based on the fair value hierarchy.

5. Mortgages and Loan Payable

	<u>March 31, 2019</u>	<u>December 31, 2018</u>

5. Mortgages and Loan Payable (continued)

The unamortized mortgage financing costs consist of fees and costs incurred to obtain the mortgage financing less accumulated amortization. For the three months ended March 31, 2019, interest expense on the statement of comprehensive income includes amortized mortgage financing costs of \$10,023 (March 31, 2018 - \$10,020).

6. Right-of-Use Asset and Lease Liability

a) Right-of-use asset

The following is the continuity of the cost and accumulated depreciation of right-of-use asset as at and for the period ended March 31, 2019:

	<u>March 31, 2019</u>
Cost	
Balance, beginning of period	\$ 80,590

Balance, end of period	<u>\$ 80,590</u>
Accumulated depreciation	
Balance, beginning of period	\$ -
Depreciation	4,934
Balance, end of period	<u>\$ 4,934</u>
Carrying amount	<u>\$ 75,656</u>

b) Lease liability

The following is the continuity of the lease liabilities as at and for the period ended March 31, 2019:

	<u>March 31, 2019</u>
Balance, beginning of period	\$ 82,470
Lease additions	-
Lease payments	(5,596)
Interest expense on lease liabilities	1,038
Balance, end of period	<u>\$ 77,912</u>

The Company used its incremental borrowing rate of 5.25% as at March 31, 2019 to measure the lease liability.

7. Purchase Price Payable

In December 2006, the Company acquired the Tri-City Mall in Cold Lake, Alberta and agreed to pay an additional \$658,776 if and when the property became fully leased at any time up to December 31, 2021. Since the Company expects to fully lease the property by this time, the contingency has been fully provided for and was added to the cost of the acquisition. As at March 31, 2019 and 2018, the property was not fully leased.

8. Financial instruments hierarchy and investments at fair value

Fair value measurements are based on a three-level fair value hierarchy based on inputs used in determining fair value of financial assets and liabilities. The hierarchy of inputs is summarized as follows:

Level 1 - inputs used to value financial assets and liabilities are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - inputs used to value financial assets and liabilities are other than quoted prices included in Level 1 that are observable either directly or indirectly for the asset or liability.

Level 3 - inputs used to value financial assets and liabilities are not based on observable market data.

As at March 31, 2019, the Company holds 1,627,200 (December 31, 2018 - 1,627,200) common shares of a related company at a fair value of \$32,544 (December 31, 2018 - \$24,408). The companies are related by virtue of the fact that they have the same President and CFO. Original cost of the investment was \$81,360. The aforementioned investment is classified as level 1 in the fair value hierarchy.

The Company did not record any transfers between fair value levels during the year.

9. Loan Payable

During the year ended December 31, 2013, the Company received loan proceeds of \$2,500,000 from a related corporation, Ceyx Properties Ltd. During the year ended December 31, 2014, the Company received further proceeds of \$7,750,000 and also repaid \$4,500,000 of the balance outstanding. During the year ended December 31, 2015 the Company received further proceeds of \$2,250,000 and repaid \$5,000,000 of the balance. During the year ended December 31, 2016 the Company received further proceeds of \$492,000. During the year ended December 31, 2017, the Company received further proceeds of \$750,000. During the year ended December 31, 2018, the Company received further proceeds of \$305,000.

The balance outstanding as at March 31, 2019 is \$4,547,000 (December 31, 2018 - \$4,547,000).

The loan is unsecured, has no fixed terms of repayment, with access to a maximum value of up to \$6,000,000, with interest payable at 6% per annum. Interest is accrued but not compounded. The loan is to be used for financing of the leasing and development of the investment properties, along with general working capital purposes. The companies are related by virtue of the fact that they have the same President. The related corporation is not a subsidiary.

13. Financial Instruments and Risk Management

Fair Value

The Company's trade accounts receivable, accrued rent receivable and other financial liabilities, which includes mortgages payable, loan payable, purchase price payable, and accounts payable and accrued liabilities, are carried at amortized cost, which approximates fair value. Such fair value estimates may not necessarily be indicative of the amounts that the Company might pay or receive in actual market transactions.

Cash, other amounts receivable and accrued rent receivable approximate their carrying amounts due to the short-term maturities of these instruments. The valuation method is classified as level 1 on the fair value hierarchy.

Management has determined that the fair value of mortgages payable does not differ from its carrying value as underlying interest rates are not materially different than current market conditions. The valuation method is classified as level 2 on the fair value hierarchy. The Company has no financial instruments at level 3.

The Company is exposed to the following risks as a result of holding financial instruments: market risk (i.e. interest rate risk, currency risk and other price risks that impact the fair values of financial instruments); credit risk; and liquidity risk.

The following is a description of these risks and how they are managed:

13. Financial Instruments and Risk Management (continued)

Market Risk

Market risk is defined for these purposes as the risk that the fair value or future cash flows of a financial instrument held by the Company will fluctuate because of changes in market prices. Market risk includes the risk of changes in interest rates, currency exchange rates and changes in market prices due to factors other than interest rates or currency exchange rates such as changes in equity prices, commodity prices or credit spreads.

During the year ended December 31, 2018, the Company converted its variable mortgages to a 5 year fixed rate of 5.26% maturing on September 1, 2023. As a result, fluctuations in interest rates does not have a significant impact on the Company as at March 31, 2019.

A change of 0.5% in the prime rate would increase or decrease the fair value of variable rate mortgages payable by approximately \$92,255 (December 31, 2018 - \$98,158).

Credit Risk

Credit risk arises from the possibility that tenants may experience financial difficulty and be unable to fulfil their lease commitments. The Company mitigates this risk of credit loss by diversifying its tenant mix and by limiting its exposure to any one tenant. The Company believes that the credit risk of trade accounts receivable is minimal as the balance receivable is limited to the amount receivable as at March 31, 2019 of \$88,008 (December 31, 2018 - \$11,723).

Rent is past due when a tenant has failed to make a payment when contractually due. Rent past due amounts to \$9,600 (December 31, 2018 - \$10,400), which is due from related parties as described in note 15.

Equity Risk

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company's investment in the common shares of a related company, Plato Gold Corp. is subject to fair value fluctuations arising from changes in the equity market. At March 31, 2019, should the equity prices of the Company's holdings increase or decrease by 5%, the impact on net loss would be approximately \$1,627 (December 31, 2018 - \$1,220).

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure and financial leverage, as outlined in note 14. It also manages liquidity risk by continuously monitoring actual and projected cash flows. The Board of Directors reviews and approves the Company's operating and capital budgets, as well as any material transactions out of the ordinary course of business. The Company is subject to the risk associated with debt financing, including the ability to refinance indebtedness at maturity. The Company believes these risks are mitigated through the use of long-term debt with maturities over an extended period of time.

13. Financial Instruments and Risk Management (continued)

Liquidity Risk (continued)

As at March 31, 2019, the Company's financial liabilities include accounts payable and accrued liabilities, purchase price payable, loan payable and mortgages payable.

14. Capital Management

The Company's objectives when managing capital are:

- a) to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits to other stakeholders, and
- b) to provide adequate return to shareholders by obtaining an appropriate amount of debt commensurate with the level of risk, to reduce after-tax cost of capital.

The Company sets the amount of capital in proportion to risk. The Company includes equity in its definition of capital. Equity is comprised of share capital, contributed surplus and retained earnings. The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristic of underlying assets. In order to maintain or adjust capital structure, the Company may repurchase shares, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Company's objective is met by retaining adequate liquidity to provide for the possibility that cash flows from assets will not be sufficient to meet future cash flow requirements.

15. Related Party Transactions

During the year ended March 31, 2019, the Company:

- a) Charged rent to related parties, Plato Gold Corp., \$600 (March 31, 2018 - \$1,200) and Ceyx Properties Ltd., \$900 (March 31, 2018 - \$3,000).
